

## Globe Blue Spruce

*Picea pungens 'Globosa'*

Height: 5 feet

Spread: 6 feet

Sunlight:

Hardiness Zone: 3a

Other Names: Blue Colorado Spruce; Colorado Blue Spruce

### Description:

A small, dense globe-shaped shrub, very unlike the species, as a mounded form that eventually becomes a compact and dense Christmas tree-like shape, adaptable and hardy; intensely blue needles, an excellent choice for form and color in the garden

### Ornamental Features

Globe Blue Spruce has attractive blue foliage which emerges silvery blue in spring. The needles are highly ornamental and remain blue throughout the winter. Neither the flowers nor the fruit are ornamentally significant.

### Landscape Attributes

Globe Blue Spruce is a dense multi-stemmed evergreen shrub with a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance shrub that will require regular care and upkeep. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Globe Blue Spruce is recommended for the following landscape applications;

- Vertical Accent
- General Garden Use

## Gertens Plant Info.

### **Planting & Growing**

Globe Blue Spruce will grow to be about 5 feet tall at maturity, with a spread of 6 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 60 years or more.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
