

Citation Columnar Yew

Taxus x media 'Citation'

Height: 10 feet

Spread: 5 feet

Sunlight: ○ ● ●

Hardiness Zone: 4a

Description:

An incredibly versatile evergreen shrub with an upswept columnar habit; bright green emerging foliage is held against dense, dark green needles in spring; a choice shrub for hedge, windbreak or privacy, takes pruning very well, does well in shade

Ornamental Features

Citation Columnar Yew is a dwarf conifer which is primarily valued in the landscape or garden for its rigidly columnar form. It has dark green evergreen foliage which emerges light green in spring. The ferny sprays of foliage remain dark green throughout the winter. The fruits are showy red drupes displayed from early to late fall.

Landscape Attributes

Citation Columnar Yew is a dense multi-stemmed evergreen shrub with a narrowly upright and columnar growth habit. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance shrub that will require regular care and upkeep, and can be pruned at anytime. It has no significant negative characteristics.

Citation Columnar Yew is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Topiary

Planting & Growing

Citation Columnar Yew will grow to be about 10 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub performs well in both full sun and full shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.
