## Lime Zinger Stonecrop *Sedum 'Lime Zinger'*

Height: 6 inches

Spread: 18 inches

Spacing: 15 inches

Sunlight:

Hardiness Zone: 4a

Other Names: Autumn Stonecrop, Showy Stonecrop

Group/Class: SunSparkler Series

### Description:

A compact groundcover, with soft pink flowers held atop of apple-green succulent foliage edged in cherry red; a drought-tolerant perennial that does best in poor soils, an excellent choice for late summer color in the garden border

### Ornamental Features

Lime Zinger Stonecrop is covered in stunning clusters of pink flowers at the ends of the stems from late summer to mid fall. The flowers are excellent for cutting. Its attractive succulent round leaves remain bluish-green in color with distinctive cherry red edges throughout the season. The fruit is not ornamentally significant.

### Landscape Attributes

Lime Zinger Stonecrop is a dense herbaceous perennial with a ground-hugging habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

## Gertens Plant Info.

This is a high maintenance plant that will require regular care and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Lime Zinger Stonecrop is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

### **Planting & Growing**

Lime Zinger Stonecrop will grow to be only 6 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 15 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 15 years.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil pH, but grows best in poor soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Lime Zinger Stonecrop is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our store for more information on how to protect it over the winter months.

### **Gertens Sizes and Prices**

#1 container - \$9.99 \* Sizes and availability are subject to change. Please check with the store for specific details.
