

Popcorn Drift Rose

Rosa 'Novarospop'

Height: 24 inches

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 4b

Group/Class: Groundcover Rose

Description:

This outstanding variety produces creamy yellow double flowers from bright yellow buds, reminiscent of buttery popcorn; foliage is dense, dark green and glossy; its spreading habit makes it perfect as a full sun groundcover for mass planting or for slopes

Ornamental Features

Popcorn Drift Rose is blanketed in stunning creamy white flowers with buttery yellow overtones at the ends of the branches from late spring to early fall, which emerge from distinctive yellow flower buds. The flowers are excellent for cutting. It has dark green foliage throughout the season. The glossy oval compound leaves do not develop any appreciable fall color. The fruit is not ornamentally significant.

Landscape Attributes

Popcorn Drift Rose is a multi-stemmed deciduous shrub with a ground-hugging habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Popcorn Drift Rose is recommended for the following landscape applications;

Planting & Growing

Popcorn Drift Rose will grow to be about 24 inches tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Popcorn Drift Rose makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our store for more information on how to protect it over the winter months.
